# ocal 544-CIO Pays Tribute to Grant Dunne

ioneer Organizer and Builder of 544 is Laid to Rest at Fort Snelling

## Funeral Address

By Farrell Dobbs

Grant John Dunne was born June 1893, on a farm east of Little Falls. innesota. He went through eighth ade in a one-room schoolhouse in country. Soon after the turn of century the Dunne family moved Minneapolis. Grant went to South igh school for one year, and then. e so many sons of the workingclass, rk. He got his first job as a bill rk for the Railway Express comy. During the next few years he Minneapolis.

On February 6, 1918, he was marto Clara Houck. They had four s, Claire, John, Richard and Rus-I. Five months after their marriage was inducted into the 3rd Pio-Infantry, and one month later he in France.

But hat beine First World War

int Finds the Answer How did it come about that he and llions of others wanted to work but ald find no work to perform? Grant ted himself this question. He again plied himself to study. He found system of capitalism to be respone for the great ills of mankind. found the answer in the workingclass movement. He came to understand the need for trade unions and for trade union struggle. He came to see the necessity for working-class political action. Fearlessly he threw himself into the task of building the union movement, of strengthening the workers' political movement. He devoted the remainder of his years to these tasks. He helped other workers find the solution to their problems.

In 1933 Grant finally landed a job as coal driver. He applied his knowledge. He was one of the pioneers who helped launch the campaign to organize the Minneapolis drivers, who helped build that organization which later came to be known as Local 544.

What Grant's Union Accomplished There is scarcely a worker in the city of Minneapolis today who can compare his present wages and conditions with those existing in 1933, without realizing that he has bettered himself to some extent, in some way, thanks to the far-reaching results of the work of Local 574 and later Local 544. The great drivers' strikes of 1934 drawe the Citizens Alliance back into the shadows and lifted the workers to their feet. Grant played a big part in the successful organization of the drivers. Seldon in the forefront, so far as the public was concerned. Grant made heavy contributions to his union. He served it as a skillful organizer. He was especially versatile in committee work. He played a builliant role in presenting testimony on the workers' movement and the needs of the workers and the unemplayed, to warious governmental bodies in Washington. For years he served the Federal Workers Section as its assistent from the General Drivers

Grant would always rise to his fullest stature at the time when his orgamization was facing its greatest cui-

In the summer of 1934, when Govcomor Olson's national grands were on the streets of Minneapolis, ware turning loose the trucks with military permits, were breaking our strike, raiding our strike headquarters, auresting our leaders and our pickets, Grant more than any other person helped turn the tide of battle. He appeared before the governor and before the colonels, forcing the release of the arrested union leaders, flording the guardsmen to evacuate the union headquarters.

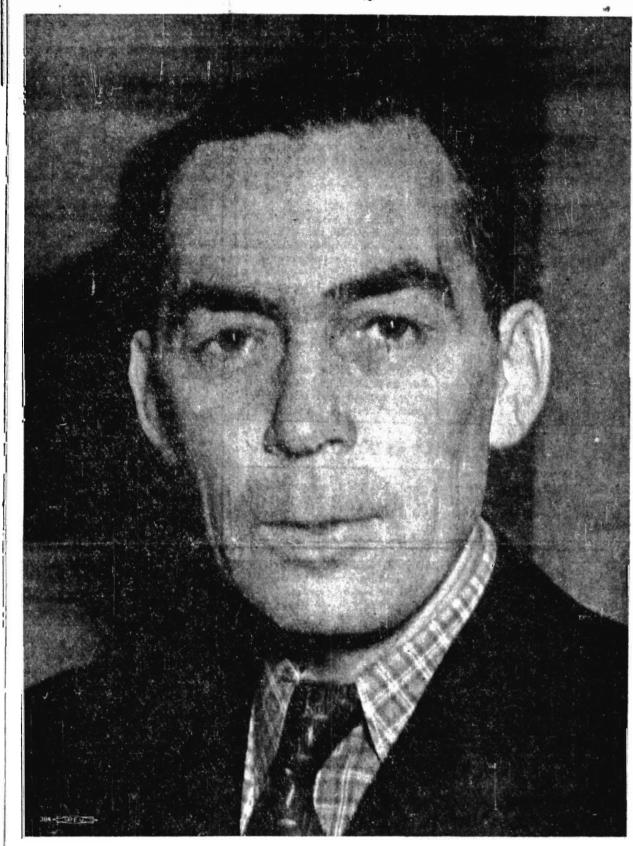

All during these years Grant auffered periodically from his war wounds. Offen it was hard and sometimes impossible for him to function. Grant did the greatest individual service for me that anyone ever penformed. He nicked me out from behind a coal pile in 1933, where I was shoveling coal for 35c an hour, bewildered and confused by life. Grant set my feet on the high road of the workers' political movement.

His Countest Contribution Grant has started hundreds of other workers on this same path, the only path that leads to the ultimate solution of all our major problems. Grant has opened the eyes of hundreds to the realities of our economic and political system. Through these men Grant Dunne will continue to serve the workers' movement until the final victory is won. This is his greatest contribution to humanity.

In recent years, Grant has seen the world again enveloped in another

### Military Service Held at Grave

His Work Resulted in Gains for Workers Throughout Minneapolis and Northwest-Thousands of Workers Pay Last Respects to Working-Class Warrior

Grant Dunne, one of the founders and builders of the Minneapolis drivers' union movement, a leader of the great 1034 strikes, and a World War veteran, and at the time of his death an organizer for Local 544-CIO, was buried Tuesday morning.

Brother Grant died by his own hand last Saturday evening, confronting burdens which he found unbearable -his prosecution at the kands of the federal government,

the treatment accorded his unions by Governor Stassen, the treachery of Dictator Tobic, the prospect of seeing his first bown son march off to a new imperialist war. Al these burdens agaravated the wounds and shocks suffered by Grant while serving in the U.S. army in France, and he reached his past decision. Hundreds of earign men and

wasten whom Grant had served in his life curried out to phonor our tailer brother at the services Thes-43y morning, Farrell Dobbs, whom Grapt had brought to the workers' venent and who served with Graph on the organizing committee strike committee which planned and conducted the great Arivers strikes in 1934, delivered the impressive funding address be fore a crowd that packed the Gleason mortuary. Grant had wanted i that way. Brother Dobbs' funera address is printed elsewhere on this

Receives Military Horois

#### Stassen in Seattle

For years progressive workers have tirelessly pointed out that both old boss-controlled parties, the Republican and Democratic, are alike as Tweedledum and Tweedledee, and that at the slightest threat of independent labor political action the two parties will unite in defense of the privileges and profits of the employing class.

Today, under the shadow of the second imperialist war, the boss politicians are more and more having to give their shell game away. Confronting the solid anti-war sentiments of the masses, a Willkie has to take a position indistinguishable from that of the man whom he campaigned against last year.

Stassen, like Willkie, long ago make up his mind to join the Roosevelt pro-war camp. Whether the initiative came from the White House or the state capitol is unimportant. Stassen signified his position by appointing the "Roosevelt Republican," Joseph Ball, as U. S. Senator to fill the shoes of the late Farmer-Labor Senator Lundeen.

The support to the boss war given by Stassen and Ball, from the heart of the anti-war Middle West, has been of inestimable value to President Roosevelt and Wall Street. Naturally Roosevelt is grateful to Stassen.

Make no mistake, it was Roosevelt who determined that the labor-hating governor of Minnesota should be the featured speaker at the AFL national convention in Seattle this week, and that the AFL sheets should be full of sticky praise for the author of the Slave Labor Act.

ctual maneuvering within the AFL Executive Council to have Stassen invited to Seattle. But Tobin and Green would never have taken such a step without obtaining the approval of the White House.

As V. R. Dunne observed in his address last Friday to the Workers Defense League, Roosevelt has chosen Stassen as his white-haired boy in the 1942 elections, and has made Stassen and Ball responsible for federal patronage in Minnesota.

Stassen may be a white-haired boy to Roosevelt. Tobin, William Green, and the bosses. But we in Minnesota know him best. The workers who have suffered under his Slave Labor Law, the educators who have watched him tear down the school system for his political ends. the Negroes who have seen him impose Jim Crow restrictions, the aged who have lost their homes due to the old age pension law, know how to make their own estimate of Governor Harold Stassen.

It will be sad, rather than amusing, to watch the Minneapolis Central Labor Union and the Labor Review, hitherto in the front ranks of the progressive opposition to Stassen, respond to pressure from Tobin and Roosevelt and betray labor by flopping over to Stassen. First they will do it silently, just as they have let pass unchallenged the brazen move of the AFL Executive Council to invite Stassen to address the Seattle convention. Later they will but it demands that it retain its to stop the upward trend of intention of introducing such a ous five statements. It reads shamefacedly come out in the open and tell the workers of Minneapolis that Governor Stassen is labor's friend.

This ludicrous and reactionary development will yet come about unless the progressives within the ranks of the Central Labor Union immediately raise their voices and cry halt!

#### The Community Fund

Ever since the bosses organized the Community Fund as a device to force the workers to pay for the casualties of capitalism, the Minneapolis Central Labor Union has ited profits, the boss class won't Last August Leon Henderson horses from both Houses, gives his correctly refused to endorse the Fund.

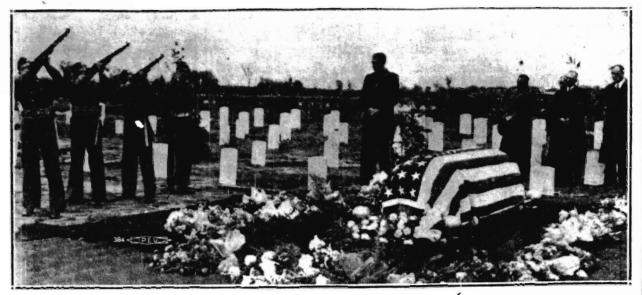

The Central Labor Union had an abundance of valid. reasons for such action. The whole concept of private agencies coping with the ocean of misery that results from capitalism is false. Only the federal government has the means and the powers to even begin to do the job. The need of the poor is not for a grudgingly-bestowed charity, BUT FOR JOBS AT DECENT WAGES.

As a device to hook labor's support, the various Community Funds throughout the country this year made arrangements also to collect money for the United Service Organizations, supposed to minister to the needs of wand, waved in the face of the na- to \$31.00. the soldiers. #### Grant Dunne Is Buried With Military Honors

The federal government that marked Grant Dunne as one of the victims of its current witchhunt, accorded the fallen unionist military honors at his burial Tuesday morning in the national cemetery, Fort Snelling. Grant served on the Argonne front in 1918, receiving a severe shell-shock from

which he never recovered and which contributed to

The army honor guard at the left fires the traditional salvo of three rounds. At the right are seen Fenton, Miles and Paul Dunne, and George Frosig.

### Funeral Address

bloody war caused by the forces of imperialism. He has seen the heavy hands of Roosevelt press on the working-class, smashing at every element of militancy in the movement, driving the masses into war.

Grant had seen the deep injustices committed against his union by Governor Stassen. He had observed the jackal role played by Tobin, betraying the workers as he always has.

Grant saw all the young men of the present generation being shoved into the maw of the war machine. He saw the Roosevelt administration lashing out against the union that Grant belonged to and against the party, the Socialist Workers Party, that Grant belonged to. He saw himself one of the victims of the vicious witch hunts that always precede and accompany imperialist war. The government and the union bureaucrats were persecuting, in Grant, a man who was himself a victim of the First World War.

As Grant saw the approach of America's entrance into the bloody struggle for markets and colonies and

profits, he looked upon his three sons of military age. He thought of the suffering this war might bring to them, as the earlier war had brought to him. He saw his first-born, Claire, a war baby, now grown and about ready to march off to another war.

These sad burdens aggravated the wounds inflicted upon him in mind and body at the Argonne. All of this was more than he could bear.

Let Us March Forward

We are gathered here to say our last farewell to Grant Dunne. We shall cherish his memory. We shall love him for the good he has done. Grant gave all that he had to give to the cause that meant more to him than life itself. He risked his life many times without giving it a second thought. He was a good fighter.

We shall write his name on the banner of his union and his party. And here at his funeral let us strike up once again the forward march to carry that banner onward-in spite of everything-to the final victory of the workers and the free world of emancipated labor.

#### On the **National** Picket Line Marvel Scholl

Recognizing that priority unemployment is one of the biggest problems facing the industrial unions at this moment, President Philip Murray issued a call this week for a conference on October 20, of all affected unions to "coordinate efforts to mitigate the vicious effects of the industrial confusion as much as possible."

President Murray's letter reads in part-

"The CIO has, from time to time, beginning long ago, pointed out that the policies and management of the National Defense Program was creating dangerous industrial and economic dislocation. . . We warned time and again that the failure to organize in such a way that full production could be established and that supplies of critical materials could be expanded would result in idle plants and increased unemployment. . . . So far, however, there has been a failure to heed the ClO's warnings or to consider its proposals, both general and specific. . . ."

Meanwhile the militant action of the Flint UAW locals-Chevrolet. Buick and Fisher Bodywho had worked out a specific plan During 1940 the entire car output to alleviate the coming tremendous drop in auto employment as 1, 1941 to September 1, 1941 a result of the OPM's order cut- there had been 319,820 cars run ting production to 50% of December, 1940, has borne some re- rate of day-by-day production up

A conference, in which representatives of the General Motors Corporation, UAW-CIO, and the Office of Production Management all took part, resulted last week in a formal announcement by GMC that it had agreed to a program of "loaning" skilled and unskilled auto workers to defense industry on the basis of seniority, and that these "loaned" workers would not lose their seniority in their home plants.

The plan provides for "loaning of workers engaged in non-defense tasks to companies in need of skilled and semi-skilled labor for armament work without loss of seniority; for co-operation with the UAW in determining qualifications for transfer to defense assignments; for defense work training; for preference to employes in local industries over workers from other localities; and for specific conditions under which workers 'loaned' or laid off will be recalled to their original employer for defense assignment."

Another clause provides that "skilled tradesmen, partially employed or employed at occupations other than their trade or its equivalent in defense usefulness, will be released upon their request with protection of their seniority rights, for full time defense work at their trade."

THE OPM issued a statement "RECALL OF EMPLOY-

EES. An employee loaned or laid off, whether unemployed or currently employed on defense or non-defense work, must report back to the company with which he holds original seniority, if and when called on notice of one week. Recall of employes to defense work presupposes and management will endeavor to provide full time employment, contingent with the availability of essential tools, material and facilities. Skilled tradesmen will be subject to recall only for full time employment at their trades or the equivalent."

"DEFENSE TRAIN-ING. For the purpose of these polities, defense training is to be considered defense employment, provided there is an understanding between the employer and the employe that the employe is being trained for a specific payroll

While the adoption of these his best but that congress wouldn't ority unemployment in the auto industry has been solved. First let us review what were some of the other demands put forward by the Flint locals-

1. That the union have a voice in the geographical plant allocation of defense orders.

2. That the Buick plants now under construction in Chicago for the assembly of Pratt and Whitgasbord in the school auditorium, ney airplane motors be used for something else and that this work be brought to Flint where there

are plenty of workers as well as plenty of plant space.

4. That workers who need additional skill for defense work be trained, under government expense, and that these workers receive a minimum of \$25 a week, the receipt of such compensation not to interfere with their right to receive unemployment compen-

The OPM plan calls for training of workers for defense work, but it makes no provisions for the compensation these men shall receive, nor does it provide for protection of their right to receive unemployment compensation.

In addition, the plan provides only that there shall be "cooperation" between the union and the management in the matter of deciding upon who is qualified for transfer to defense industry. Not one word about the redistribution of contracts to plants which will soon be shut down, not one word about the geographical location of new plants. And in Flint and the the men are demand surrounding area, auto production s almost the only industry.

In gaining the right to retain seniority for its members in transfer to defense industry, the union has won the first major battle in this war against wide-spread unemployment. But the fight still remains only in its initial stage.

Of course, the auto barons are not too concerned about the ordered curtailment of their indus- sen's crooked labor try. They do not fear the "loss" of profit which such a program seems to indicate because THEY ALREADY REAPED HAVE MOST OF THOSE PROFITS. stood at 272,673. From January off the assembly lines. And the to the present, makes the union fear that wide-spread unemployment will result far ahead of the heral parade for the December 1 curtailment date.

All of the auto companies hold huge defense contracts -contracts which they have not even, in most cases, begun to fill. In the entire GMC system, there are only 45,000 workers engaged in defense work. Those new plants which the auto industrialists have built have been built by amortization of the government, and they have been located in far-flung, isolated, non-union communi-

Recently Representative Tolan was sent to Detroit to conduct an tion of the shooting. investigation into the auto production curtailment problem, from the point of view of unemployment, etc. UAW President R. J. Thomas sent a brief to this committee in which he set forth many facts, among which was definite placing of responsibility for the dislocation of industry squarely upon the shoulders of the industrialists. He said-

. . . Major auto companies preferred not to tamper with their regular productive equipment. "Last winter . . . they were engaged in

a record-smashing passenger car production and sales campaign. That brought big profits out of the defense prosperity. But last winter's 'business as usual' is going to mean 'unemployment as usual' for auto workers."

Thomas also points out that the corporations' unwillingness to retool their existing plants, their desire for new aircraft plants and new machine tools, springs from their desire to be able to compete with one another after the war, in the manufacture of commercial aircraft.

Economists could probably talk or hours explaining the intricate reasons for the present chaos and confusion of industrial dislocation. But when it all boils down to plain every-day language, the real reason is the greed and avidity of monopoly capital, the boss class. The big bosses are willing to "sacrifice" anything-except the stupendous profits which this defense program is netting them. They are patriotic" only to that extent
